

MOTION PLATFORM

QS-S35

6 DOF

The QS-S35 has the largest motion envelope in the Qubic line. Its 300 mm actuator stroke gives the widest heave range of any compact QS platform - enough to reproduce full cornering forces and heavy turbulence without clipping, so what is felt matches what is seen even during extreme maneuvers. Built for dedicated sim rooms and commercial training centers.

WHY QS-S35

Unleashed Performance
300 mm stroke for the most realistic motion experience

Commercial Grade
Built for training centers and professional sim rooms

Full Motion Envelope
Three times the heave range of any compact 6DOF

Industrial Endurance
Built for commercial duty in training centers and professional sim rooms.

WHAT TO EXPECT

RACING SIMULATION

- Full cornering force reproduction
- Extended traction loss sensation
- Continuous motion without clipping
- Multi-axis combined dynamics

FLIGHT & TRAINING

- Full turbulence envelope
- Realistic spatial disorientation cues
- Extended G-force range
- Extended sustained-motion cues

COMPATIBLE WITH

- QS-BT1 Belt Tensioner
- Most Sim Racing Accessories
- Flight Simulation Peripherals
- Commercial Training Systems

WHAT'S IN THE BOX?

QS-S35 Motion Platform

- 6x industrial-grade linear actuators
- Upper and bottom frame
- Monitor mounting brackets
- Transport wheels

Accessories

- Motion controller
- Motion-Lock
- Main power switch
- Set of cables
